

SupraCath™

Two-way suprapubic catheters with integrated balloon

The SupraCath™ range from Endotherapeutics offers several features to enhance patient comfort and allow maximum drainage through a smaller-sized puncture site.

1. Soft, medical-grade silicone is hypoallergenic and less prone to encrustation
2. Integrated balloon enables insertion through a smaller introducer and facilitates smooth removal by minimizing cuffing difficulties
3. The open end reduces blockage and enables over-the-wire exchange of catheters
4. Large side eyes allow maximum drainage
5. Short tip reduces bladder irritation and is ideal for long-term drainage

- Sizes 10 Fr through to 24 Fr
- 14 Fr, 16 Fr, 18 Fr and 20 Fr in standard and short lengths
